Welcome

Let’s face it, this summer will be different in ways that we could not have imagined just a few short months ago. But different doesn’t mean less fun or less active. Despite the challenges facing all of us as we try to navigate daily life in a safe way, the Parks and Recreation Department is hopeful and confident that much of our familiar South Kingstown summer activities will happen. Programs, leagues, and camps will be offered in creative ways that abide by the necessary health and safety guidelines. Some larger community events will be rescheduled to a later date when we can all be together. This brochure was prepared with the knowledge that circumstances may change – and we will adapt as necessary. But in the meantime we are ready for summer and ready to spend time doing fun things with you in our wonderful parks. The entire SKPR team looks forward to seeing you soon.

The Knapp School of Music
Bringing music to our community for over 85 years

Mission
The mission of the school is to develop and encourage an interest in music within the community at large. It also strives to make classes affordable, offering opportunity to those who might otherwise have difficulties in obtaining music lessons.

History
Founded by Mrs. I. Peace Hazard and Mme. Charbonnel in 1933 as the Neighborhood Guild School of Music, today’s Knapp School of Music takes its name from pianist Raymond Knapp who directed from 1939-92. Mr. Knapp was a protégé of Madame Avis Bliven Charbonnel, Nicholas Slonimsky, and David Barnett. According to one former student, “Mr. Knapp maintained a high level of pedagogy - teaching a holistic approach to music that encompassed history as well as theory, technique, and composition.” Mr. Knapp taught and inspired many pianists, two of whom are currently on the faculty.

Private Lessons and Group Classes
Private lessons are offered for Piano; Voice; Guitar (acoustic, electrical and classical); Bass guitar; Harp; Trumpet; Drums; Violin and Suzuki Violin; Mandolin; Cello; Jazz Piano; Music Composition and Arranging. Students ages 6 and over are welcome.

Group classes are also offered seasonally on Violin and Mandolin.

Enrollment
Simply call the Neighborhood Guild at 789-9301 and have your name put on the music lesson list. An instructor will telephone you with enrollment information.

Private Lesson Fees and Schedules
Private lesson students have a half-hour lesson once each week, on the same day and hour. All lessons will be paid for in advance and by the month. Payments are due on or before the first lesson of the month. The cost of a half-hour lesson is $22. The non-refundable registration fee is $25 per student from September 1st – February 28th and $10 from March 1st – May 31st paid prior to the first class, and annually (in September) thereafter. There is no registration fee collected from June 1st – August 30th. Students will purchase music books and materials from the instructor, as the need arises. Group class fees; see each class listing.

Absentee Policy
No refunds will be given for missed classes. When sufficient advance notice is given for an absence a make-up lesson may be offered, as the instructor’s schedule permits. Please call ahead of time if you know you will miss a class. Please give one month’s notice if you decide to discontinue lessons. This will assist in accommodating those students on a waiting list.

Preparing for Classes and Instrument Maintenance
All students must have an instrument at home. Daily practice is very important. Parents can assist by helping the student set up regular practice times, free from interruption, noise and other distractions. Providing verbal encouragement and listening to student’s play is also helpful. For proper aural development, pianos should be tuned regularly.

Recitals
Student recitals are held periodically at the Guild. Students are invited to participate. There is a small charge to attend the recitals.

Welcome
It is amazing that the Rec Center will be celebrating its 3rd anniversary this summer. In such a short amount of time, we have accomplished a lot, and still have so much to offer. Although this is not how we envisioned celebrating, we are happy to reflect on everyone that has supported us along the way and added to the success of our beautiful facility. This pandemic is a small detour to our goal of providing a first class experience for our community. We will take it as an opportunity to adjust, adapt, and add new and exciting possibilities. Thank you for your patience and understanding as we navigate the best options for your participation in our programs. Stay safe, stay healthy, and we look forward to seeing you soon!

Four Reasons Picking Up After Your Dog
Is More Important Than You Think!

The Parks and Recreation Department cares about our parks and your pets! We want to take this opportunity to encourage you to pick up after your pet. We have mutt mitts stations located throughout our park system for your convenience. Please let your dog spend time at the dog park. It is a great location to let your dog run and have you socialize with other dog lovers. Thank you for remembering that our ballfields are for youth and adult sporting activities and per park rules not for your pet. Dogs must be leashed at all times in park areas outside of the dog park.

Common Courtesy – What’s that smell?
There are many things that can ruin your day, but stepping in a steaming pile is definitely high on the list. There are not many things that are more unpleasant than getting in the car, and blasting the heat, only to discover a terrible odor emitting from the floorboards. When you take your pet off of your property, you are entering public shared space. It is the duty of pet owners to ensure that they pick up after their pets. Your dog’s waste is your mess, and you need to pick it up yourself. No one likes a messy shoe and a stinky car.

It’s Just Poop, It’s Natural Like Cows, It’s Fertilizer – Not True!
A common misconception, or excuse people use, is that poop is natural fertilizer. However, this is not really true. Not all piles of poop are created equal. Cow manure has a very different make up from dog waste because their digestive systems, and diets are very different. Cows are herbivores, whereas dogs are omnivores, and their diets are very high in protein. Dog waste is actually so high in nitrogen and phosphorus that it can have the opposite effect of fertilizer. It can actually burn your lawn if you don’t pick it up. It also causes all sorts of issues for local watersheds.

It Will Just Wash Away and Be Gone Soon – Not True!
Another common misconception is that if you don’t pick it up, it will quickly break down or wash away. However, once again, this is not the case with dog waste. In fact, dog waste can take as long as a year to naturally break down. Especially since we live in a climate with a colder winter season. The other down side here is that, as previously mentioned, the bacteria still lingers in the soil. So even if you leave the poop on the ground and it does eventually break down, all of those bacteria and parasites will be left to linger there for several more years.

Disease Causing Bacteria and Parasites – Harmful For Humans And Dogs
Nitrogen and phosphorus isn’t the only thing that dog waste has a lot of. Dog waste is full of disease causing bacteria and parasites than other types of waste. These bacteria and parasites are harmful to humans and spread disease to other dogs. Dog waste is full of E. coli, salmonella and is a common carrier of worms. These bacteria and parasites can actually linger in the soil for years. If you don’t pick up after your dog, you are putting other people and other dogs at risk of getting sick.

In summary, Poop Happens. It’s important to do your part! Please be a responsible pet owner and pick up after your dog.
South Kingstown Parks and Recreation Tree Planting Tips

Plant it Right

Using the right tree in the right place, and maintaining it correctly will provide healthy, beautiful trees whose benefits can be enjoyed by the community for many years. Planting can be done at any time of year; however, fall and early spring are the best times. Successful planting depends on the hole you dig. Structural roots anchor the tree and provide the framework for the absorbing roots. Absorbing roots are tiny roots found in the uppermost part of the soil. They provide the tree with water, air, and nutrients. Provide good conditions and your tree will grow fast and strong.

Your tree will be in one of these three forms when you purchase it.

**Balled and Burlapped:**
Be sure to remove all ties from around the trunk. Remove all wires, twine and wire baskets from the root ball. Gently pull the burlap away from the ball, ease the roots through the burlap and remove the burlap completely.

**Container:**
Remove the container before planting. This includes peat pots.

**Bare Root:**
Make the hole wide enough to completely spread the roots out in all directions. This helps optimize the root growth.

---

**Planting the Tree**

**Digging the hole**
*Remove grass sod and dig a saucer shaped hole, wide at the edges.*  
*Pile soil in one area so it is easy to reuse.*  
*The hole should be three times as wide as the root ball and the depth of the root ball.*  
*Roughen the sides of the hole so roots can penetrate the soil.*

**Preparing the Roots**
*Gently massage the root ball until the roots are loosened.*  
*Remove any soil from above the root flare. The root flare is where the roots spread out from the trunk of the tree.*  
*Root tips die when exposed to excess light and air. Work quickly!*  

**Placing the tree in the hole**
*Make a mound of soil in the middle of the hole to set the root flare even with the original grade around the tree.*  
*Spread the roots out in all directions.*

**Backfilling the hole with soil**
*Lightly press around the roots to collapse air pockets as you backfill with soil.*  
*Water thoroughly.*

**Mulching around the tree**
*Form a mulch ring around the tree keeping the mulch away from the trunk. Mulch helps by keeping out weeds, keeping the soil moist, and keeping grass trimmers away from the trunk.*  
*Mulching materials include compost, bark, wood chips etc.*  
*Mulch should be about three to four inches deep. Form a three foot radius circle from the trunk the tree.*

**Staking the tree**
*Stake only if necessary; do not use wire or anything that could cut into the bark. Ready-made tree ties work well. Staking should be removed after one year.*

**Fertilizing**
*Do not fertilize the tree during the first year.*
